Street pigeons are a common sight in many European cities. In fact, a visit to a major European city just would not be the same 16 encountering them: bathing in fountains, perching on historic buildings, and flocking in public squares. In Barcelona, however, the birds are now threatening to 17 the city's historic center, pooping on monuments, buildings, and even tourists.

The city council originally proposed 18 the pigeon population by gathering the birds and shooting them. But that idea led to strong protests from numerous animal rights groups. After heated debates and discussions, the government was finally persuaded to consider another 19 effective method: giving the pigeons birth control.

In 2016, the city council decided to put its 85,000 pigeon population on a birth control pill to block the formation of eggs in birds. Starting from April 2017, the pills were placed in 40 bird feeders 20 throughout the city. It was predicted that there would be a decrease of 20 percent in the pigeon population in the first year and between 70 and 80 percent in four or five years.

Being hit by lightning is a rare event. Over the course of an 80-year life span, the odds of being hit by lightning are 1 in 3,000, 21 the probability of being struck seven different times. Roy Sullivan, a park ranger in the United States, was struck by lightning more recorded times than any other human being. Over his 36-year career, Sullivan was struck by lightning seven times—and 22 each shock!

Strikes one, two, and three were pure bad luck, he thought. But after strike four, Sullivan became 23 death and took precautions during lightning strikes. Strike five occurred in 1973 when Sullivan was on patrol. A storm cloud “chased” him until he was struck. The same thing happened again in 1976. Sullivan, while surveying a campground, felt that a cloud was 24 him, and tried all he could to run—but it got him anyway. Finally, on 25 June 1977, a seventh and final bolt struck Sullivan as he was fishing in a pond. “I don’t believe God is after me,” he theorized. “If he was, the first bolt 25 enough. Best I can figure is that I have some chemical, some mineral, in my body that draws lightning. I just wish I knew.”

Glaciers are usually associated with colder climates. But some mountain ranges of South America, Africa, and Indonesia are also 26 glaciers and ice sheets. These tropical glaciers serve as a major source of water supply to one-sixth of the world's population.

A newly published study, however, revealed that rising temperatures are posing an 27 threat to the last tropical glaciers in Indonesia's Papua region. The ice sheets, which once spanned 20 square kilometers, are thinning over five times as quickly compared to a few years ago. 28 already shrunk by 85% to a mere 0.5 square kilometers, Papua's glaciers will completely disappear within a decade, researchers have predicted.

The disappearance of the glaciers will also leave a significant 29 impact. For many indigenous Papuans, the ice sheets represent a sacred symbol. "The mountains and valleys are the arms and legs of their god and the glaciers are the head," explained the head researcher.

The study warned that Papua's glaciers are only the "first to go" if greenhouse gases are 30 and temperatures continue rising. And this is certainly a serious warning about the depressing fate of other glaciers around the world.

第 41 至 44 題為題組

The prickly pear cactus is such a powerful symbol in Mexico that it occupies a prime spot on Mexico's national flag. The plant was considered sacred by the ancient Aztecs, and modern-day Mexicans eat it, drink it, and even use it in medicines and shampoos. Now scientists have come up with a new use for the bright green plant: producing renewable energy.

Known locally as *nopal*, the prickly pear is farmed on a massive scale in Mexico. Over the years, only the edible soft inner flesh has been used. The cactus's thick outer layer (i.e., husk), with all those spines, had always been viewed as a waste product until researchers developed a biogas generator to turn the husks into electricity.

The pilot project dedicated to developing the cactus biogas generator began in the south of Mexico City. The area produces 200,000 tons a year of prickly pear cactus—up to 10 tons of which ends up as waste on the floor of the cactus market each day. Then, a local green energy startup company got the idea to turn that waste into energy. The generator is now in place at the cactus market, where the vendors are enthusiastic about this new way to utilize the tons of cactus husks that once went directly into the trash.

The prickly pear has a number of advantages over other biofuel crops, such as wheat, sugarcane, and soybeans. For one thing, only the husk of the cactus is used for generating biofuel, while its inner flesh is still preserved for food. Therefore, using the plant as a fuel source will not put pressure on food prices. Moreover, the cactus requires minimum water, and thus is not grown on traditional agricultural pasture. This means that no increased competition arises for the water or land presently used for food production.

The project in Mexico City has brought new hope to reducing the use of fossil fuels. If it can be expanded, the prickly pear could be the key to Mexico's energy future.

第 45 至 48 題為題組

The concept of a travel document, which shows a person is under a ruler's protection while in a foreign land, has probably existed since rulers and states were first invented. But the earliest mention of an object which we might recognize as a passport appeared in about 450 B.C. The Hebrew Bible states that Nehemiah, an official serving King Artaxerxes of ancient Persia, asked permission to travel to Judah. The King agreed and gave Nehemiah a letter "to the governors of the province beyond the river," requesting safe passage for him as he travelled through their lands.

Later, in the medieval Islamic Caliphate, a form of passport was the *bara'a*, a receipt for taxes paid. Only people who paid their taxes were permitted to travel to different regions of the Caliphate. In medieval Europe, on the other hand, travel documents were issued by local authorities, and generally contained a list of towns and cities which the document holder was permitted to enter or pass through. On the whole, documents were not required for travel to seaports, which were considered open trading points, but documents were required to travel inland from seaports.

King Henry V of England is credited with having invented the first true passport, as a way of helping his subjects prove who they were in foreign lands. The earliest reference to these documents is found in a 15th-century Act of Parliament, while the term "passport" came into use about a century later. Nevertheless, passports were not generally required for international travel until the First World War. It was at this time that passports as we would recognize them today began to be used.

45. How is the information in the passage organized?

- A (A) In order of time. (B) By cause and effect.
(C) In order of importance. (D) By definition and illustration.

- B (A) It was issued by the king of Judah.
(B) It was given to an official of Persia.
(C) It appeared more than three thousand years ago.
(D) It served to invite people to travel beyond the river.

47. When did the term "passport" start being used?

- C (A) In about 450 B.C. (B) During World War I.
(C) In the 16th century. (D) During King Henry V's reign.

48. Which of the following is **NOT** mentioned in the passage as a form of passport?

- D (A) A letter. (B) A receipt. (C) A proof of identity. (D) A list of seaports.

第 49 至 52 題為題組

Benjamin Franklin, one of the Founding Fathers of the United States, was not only a great politician but also a highly accomplished scientist and inventor. Of his many achievements, probably the least well-known are his accomplishments in music. He invented an instrument for which both Mozart and Beethoven composed music—the glass armonica.

In 1761, while living in England, Franklin heard a performer playing musical glasses. Franklin was charmed by the music, but felt that there was a better way to create the same sound. He had a glassmaker create thirty-seven hemispheres made of glass, with each being a different size and thickness to produce different pitches. The glass hemispheres were color coded with paint to identify the notes. Franklin ran an iron rod through a hole in the top of each hemisphere so that **they** could nest together from largest to smallest. He linked all of this to a device shaped like a spinning wheel, with a foot control that turned the rod, making the glass hemispheres rotate. Franklin moistened his fingers and held them against the rims of the glass hemispheres as they turned, producing a unique sound. He mastered the instrument and took it to parties and gatherings to play for his friends and acquaintances. The instrument became so popular that thousands were built and sold.

But musical fashions changed. Music was moving out of the relatively small halls of Mozart's day into the large concert halls of the 19th century, and without amplification, the glass armonica simply couldn't be heard. Concert reviews from the period mourned the fact that the armonica sounded wonderful—only when it could be heard. So, alas, Franklin's marvelous invention was ultimately abandoned. The popularity of the instrument faded early in the 19th century, but it is still played occasionally today.

49. Which of the following is the closest illustration of Benjamin Franklin's invention?

(A)

(B)

(C)

(D)

50. Which of the following statements is true about how the glass armonica works?

(A) Water has to be poured into the glass hemispheres.

(B) Colored paint makes it sound better and last longer.

(C) An iron rod is used to strike the thicker glass hemispheres.

(D) The performer's fingers have to be slightly wet when playing it.

51. According to the passage, why did the glass armonica lose its popularity?

(A) The skill of playing the glass armonica was very hard to master.

(B) Famous musicians like Beethoven had problems composing for it.

(C) Concert halls became too big for its music to be heard by the audience.

(D) Reviewers in that time indicated that it was clumsy and not fashionable.

52. What does the highlighted "**they**" in the second paragraph refer to?

(A) Iron rods.

(B) Hemispheres.

(C) Colored notes.

(D) Musical pitches.

Morgan's Wonderland, located in San Antonio, Texas, is a theme park geared mainly toward mentally or physically disabled children. The park was built by Gordon Hartman, a former real estate developer. The creation of the park was inspired by his daughter, Morgan, who suffers from severe cognitive delay and physical challenges.

The world's first **ultra-accessible** family fun park, Morgan's Wonderland opened in the spring of 2010. Admission for guests with special needs is free, and fees for the general public are set at a much discounted price so that people of all ages and abilities can come together and play in a fun and safe environment.

Completely wheelchair-accessible, the park features 25 acres of attractions including rides, playgrounds, a catch-and-release fishing lake, and picnic areas throughout the park. The wheelchair guests can transfer out of their chairs into unique, waterproof chairs and enjoy the splash park without risking damage to their personal wheelchairs.

愛普徠教育顧問走遍各大學系，訪問過無數教授，因此比各高中老師更了解各大學教授，黃會長：「像我孩子是高三，我覺得以我是家長會會長，都不了解這方面的資訊，更何況是一般的家長。那當學校資訊很薄弱，孩子不知道怎麼辦的時候，剛好有愛普徠這個公司來幫我們家長及學生！」

愛普徠教育顧問考生遍布全台各地，除了眾所皆知的知名明星高中外，北部各大私立名校的學生亦爭相尋求愛普徠教育顧問的協助！私立大同高中家長會陳榮譽會長：「哇！三大私立名校有好多學生也都來(愛普徠)了！由此可見這些學生們在申請大學的時候，他們內心跟方向，是徬徨、沒有把握的。」

愛普徠教育顧問向來抱持著「不僅要讓您考上，還要讓您考得更好」的宗旨來服務辛苦的學子，三位家長會長的子女也都藉由愛普徠教育顧問的協助，順利申請進入心目中的第一志願，黃會長：「我認為愛普徠應該做更廣泛的宣傳，讓學校端、學生端、家長端了解這麼好、這麼專業的機構。因為幾乎透過愛普徠的服務與指導後，(考生)都上了理想學校！」；董會長：「還好當時有帶兒子來愛普徠，書審資料看起來不只美觀很多，也更有重點及完整性，學測成績當然要自己考，但考完後備審資料準備也不能忽略，因為備審資料在申請入學中比重佔很大。」；陳會長的女兒李同學：「愛普徠讓我考上心中理想的學校，所以愛普徠給了我第一志願！」愛普徠的專業及貢獻，是所有考生有目共睹的！

愛普徠教育顧問 獨特的啟發式輔導

千萬不要讓小孩輸在大學學測的最後一哩路

愛普徠教育顧問以「啟發」同學為出發點，
以考得更好為目的，不僅要讓您考上，還要考得更好！

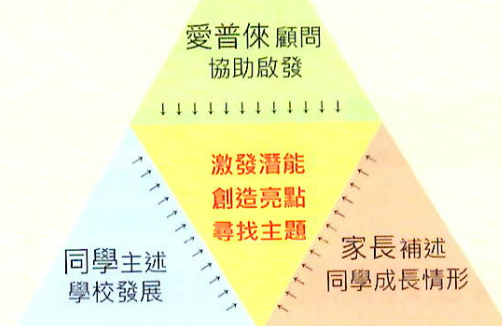

嘿！
請注意！

備審資料並不是美編比賽或文字潤稿的作品，愛普徠為您的備審資料創造高分亮點，找出主題關鍵！

- 備審資料不是要漂亮，也不是作文比賽。
- 坊間許多補習班及代辦都強調備審要精美，這個觀念並不正確。
- 一般補習班或學校能做的就是幫學生潤稿修改自傳，事實上這樣的助益是不大的，甚至還可能會造成反效果。

只有愛普徠顧問「希望」家長參與，「敢」讓家長參與

為了協同學長能夠考上比原來學測成績更好的科系，並在未來進入大學後有優秀的學業表現，愛普徠教育顧問的「啟發」專案，廣受大家歡迎，且成效卓著。我們期望同學偕同家長一起與顧問參與訪談討論，除了讓同學主述在學校的發展情況，家長在旁補述同學的成長情形，並與顧問討論激盪，共同創造出學生備審資料的亮點，尋找主題啟發學生潛能！
